So you would like to do something special to entertain the children during the Christmas holidays? Some folks like to gather up the kids and their friends for a visit to a museum, and there are several in Houston offering special holiday exhibits.

If your idea of a museum is a dusty collection of relics, it's time you revised your thinking—because the modern museum is making great effort to involve the viewer in the exhibit and to stir his imagination.

Take the new Museum of Medical Sciences, for instance. It's located on the top floor of the Museum of Natural Science at the Caroline Street entrance to Hermann Park. Its series of exhibits are designed to be touched and poked. It has buttons to push and earphones to listen to recorded explanations. And the focal point of the museum is a transparent mannequin, nicknamed Tammy, who stars in a continuous theater-type presentation explaining the anatomy and physiology of the human body.

The entire museum has been built to foster an appreciation of the body and its marvelous systems. "The gift is yours to care for and enjoy for a lifetime," Tammy says, at the conclusion for her narrative.

A Baytown Sun photographer recently accompanied a tour group from Harlem Elementary School to the museum and recorded the students' delight as they were invited to shake hands with a skeleton, blow into a machine measuring their lung capacity, take their own blood pressure readings, check their vision, and gaze at models of newborn babies.

The museum, like the Museum of Natural Science, will be closed on both Christmas and New Year's Days. But it is open from 9 a.m. to 5 p.m. Tuesday through Saturday, except for the holidays, and from noon to 5 p.m. on Sunday and Monday. It is open from 7:30 to 9 p.m. Friday and Saturday. There is no admission charge.

PLANETARIUM SHOW
If you go to the Museum of Natural Science and the Museum of Medical Science during the holidays, you want to also include a show at the Burke Baker Planetarium, which is currently featuring its traditional holiday presentation, "A Christmas Story." While you lean back in soft upholstered chairs, the planetarium recreates the

May this holiday season bestow on you every blessing and happiness. Please accept our best wishes, and may we express our gratitude to you for your loyal patronage. Thank you!
