Money, Mobility and Spare Time Involved in Drug Abuse

FROM PAGE 1

lor University, Dr. O. A. Fly and attorneys Perry Barber and Gordon Gooch headed a survey effort in 100 schools earlier this year.

Most of the school counselors queried reported some drug abuse current on campus, but only 12 schools reported on particular drugs, narcotics or solvents used.

"Until better data is available, I would not be comfortable in estimating the extent of drug abuse among teen-agers," said Dr. Schoolar.

But, he added, it is known that students are keeping abreast of medical research into harmful effects of drugs and narcotics.

"We do know, from a medical standpoint, that the use of LSD and speed (methedrine) has fallen off drastically, which indicates the young people are able to apply the biological data we have developed and act on it," Dr. Schoolar said.

Three Factors

Jim Hall, a counselor and debate coach at Westchester High School, said it is essential that high school students themselves be involved in anti-drug abuse programs.

Hall said adults and authorities err in understanding the sophistication of teen-agers today.

"For drug abuse to be a problem, three factors must be present," said Hall. "There must be money, for drug abuse is largely a problem of the affluent. There must be mobility, and most of the kids from affluent families have cars. And there must be unsupervised time.

"That's why I recommend these kids be involved in something. You can't keep information from high school students like we used to and it's no longer sufficient to say 'it's against the law' when discussing drug abuse.

"You must provide meaningful information, biological data that proves marijuana is harmful."

Hall estimated 15 percent of students of Westchester and Memorial, where he was a teacher, used marijuana regularly. Including youngsters who only experiment, he estimated 29 percent would be a conservative figure.

Admitted Users

Four admitted teen-age users in the Southwest and Northwest areas were interviewed. All said they believed from 10 to 15 percent of students used narcotics.

"But I actually know fewer than 10 guys, besides myself, who use marijuana," said one. "I use it because it relaxes me, usually when I'm listening to music alone in my room. I don't feel it's harmful in any way. The only thing that scares me is the fact I might be busted (arrested)."

Fewer Than 20

This youth said he had given up marijuana because his girl friend threatened to sever their relationship unless he quit.

Of the other three, two said they knew fewer than 20 others who used marijuana. The third said he knew only two others besides himself.

One said he began using marijuana because of emotional problems. The others said they commenced out of curiosity when offered a cigaret by friends.

They said students buy their marijuana from other students, and some youngsters regularly make trips to Mexico to buy marijuana.

"Heroin, LSD and speed are real no-nos," said one. "Only idiots use them now. I used LSD twice and put it down."

Dr. Ann Moon, chief clinical psychologist at Hedgecroft Community Mental Health Center, recently surveyed — as part of the center's activities—1800 7th, 8th and 9th graders on drugs and other problems. The Houston Pharmaceutical Association and the Houston Health Department participated.

Sindy Not Refined

"It was not a refined study," said Dr. Moon, "and it has not been fully evaluated, but I feel that 3 out of 10 teen-agers in the 13-19 bracket, perhaps more, have experimented with drugs of one kind or another. I would say 5 to 10 percent use drugs or narcotics regularly."

H. M. Landrum, Spring Branch superintendent of schools, said:

"My only information comes from my principals. They tell me that the habitual users in our district represent from 2 to 5 percent of our total secondary enrollment.

"I would guess that 20, maybe as much as 20 percent of this enrollment has tried some form of drugs on occasion, but I have no way of being precise about that."

25,000 Copies Printed

Mrs. Montgomery's group, through funds from educational foundations and personal contributions, puts out a "Handbook for Parents" on drug abuse.

"We printed 25,000 copies," said Mrs. Montgomery. "We distributed the first 10,000 to member families and to groups and agencies we could identify as youth leaders, such as church, school and civic groups.

"We felt the remaining 15,000 copies would fulfill anticipated requests for at least two years.

"The supply lasted less than three months, which gave us an inkling of the immunity of the problem."

Capt. Renois' office also distributes free pamphlets on narcotics and marijuana, outlining the dangers of abuse.

"But the kids are more interested than the parents," said Renois. "We get 15 or 20 students a week in here asking for information on drugs and narcotics. We get maybe a dozen parents and most of them call in and won't give their names."

Arrest Figures

Capt. Renois bases his estimate of drug abuse among teenagers on arrest figures, plus the fact that his men come in contact with youngsters known to use marijuana but against whom the police lack evidence.

"The solution to the problem lies with our educators, not our policemen," he said. "Instead of our officers lecturing to the kids, we should educate the teachers and let them implement the preventive programs in school.

"And we should involve our young people in such programs. After all, they're the only ones, really, who know the actual extent of the problem and who's involved."

Drug Education Need Pointed Up

Dallas (AP)—The president of the National Science Teachers Assn. said there is a need for drug education in the schools.

Dr. Elizabeth Simendinger, attending NSTA's 17th annual convention, said that drug education should begin in the elementary grades and should include everything from aspirin to LSD.

Campus Disorder Retaliation By Nixon Limited

FROM PAGE 1

disaster to those nations that have submitted to such forces of obfuscation and repression, but cultural calamity as well. It is not too strong a statement to declare that this is the way civilizations begin to die."

Keep Principles

At such a time, Mr. Nixon said, the first thing to do is reassert first principles—principles, he said "the federal government cannot, should not—must not—enforce." He said enforcement fundamentally is the task of the university community.

The first principle, Mr. Nixon said, is that the independence and competence of the faculty and the commitments and competence of the student body must not be compromised.

The second is that the university community must never let violence or the threat of it influence its actions and judgments, he said.

The President conceded though, that students are focusing on many wrongs. It is sloth-

Reshape Schools

Student unrest reflects a deep, growing social unrest affecting much of the world, Mr. Nixon said, and the problem will not be solved by self-righteous indignation by society.

Educational institutions must reshape themselves to keep "depersonalization of the educational experience" from becoming "total alienation," he said.

And he said universities must reform to include experiments in curricula such as ethnic studies, student involvement in decision making and a new emphasis on faculty teaching.

ful, dishonest, futile and an affront to the principles of academic freedom, he said, to ignore issues on students' minds.

Union Drops Resort For Members

Elsinore, Cal. (AP) — A laundry workers' union in Los Angeles is abandoning its 10-year-old health resort, saying fewer than 10 percent of its 6000 members, mostly low income Negroes and Mexican-Americans, used it.

An industrial relations study showed that, to many workers, the idea of a luxurious lakeside resort seemed culturally alien. The study also showed that the members don't like to think of themselves as laundry workers and, thus, weren't anxious to mix socially with their fellow workers.

Spokesmen said free dental care may be provided the workers instead of the spa 70 miles southeast of Los Angeles.

QUARTZ DONATED

Dr. Richard A. Roland, new curator of geology at the Houston Museum of Natural Science, accepts a huge quartz crystal from Mike Pugh, son of Mr. and Mrs. Arthur Pugh. The crystal will be displayed at the museum. The elder Pugh is assembling the museum's dinosaur skeleton.

Finch Gets Lawyer's Note On Integration

FROM PAGE 1

off without the general consel's approval.

Legal Custody

If its own lawyer says a suspect school district is complying with the law, HEW is in no position to defend a cutoff if it is taken to court. In effect, Mardian would thus have legal custody of the guidelines.

The Californian is the first conservative Republican to have found his way into HEW's inner circle.

Mardian was a special field representative for former chairman Dean Burch's Republican National Committee in 10 Western states during the 1964 Goldwater campaign.

His tentative new appointment has been used to reassure Southern Republicans uneasy or angry about Finch's continuing cutoffs of federal funds to recalcitrant Southern school districts.

The State, a newspaper in Columbus, S.C., reported 10 days ago, after a meeting between Southern Republican chairmen and national GOP officials at the White House, that "the Dixie leaders are also pleased with the selection of Robert Mardian of California to be HEW general counsel.

Several Ways

"They consider him to be 'reasonable' in the area of school desegregation."

The main point of Mardian's memo to Finch was that HEW's guidelines go beyond both the 1964 Civil Rights Act, the source of HEW's authority to cut off funds, and the most recent desegregation decisions of the federal courts.

HEW officials have been telling Southern schoolmen they must desegregate completely by September, 1969, or in special cases, September, 1970, at the latest.

The guidelines suggest several ways to achieve complete desegration. One is "pairing" formerly white and Negro schools. Another is drawing new attendance zones.

One of the main legal bases for the 1969 and 1970 deadlines is last May's Supreme Court decision in the so-called Green case. In the Green decision, the court threw out a freedom-of-choice plan that wasn't working fast enough, and said "the burden on a school board today is to come forward with a plan that promises realistically to work, and promises realistically to work now."

Quietly Beat

Mardian argued that this does not mean a school district must desegregate now.

He simply means, he said, that a school district must start desegregating now.

Southerners, Mardian went on, say their main objection to pairing and zoning is that both would require "the teaching of underachievers in the same classroom with overachievers."

He suggested that Finch meet this objection by accepting plans that would let Southern school districts spend a few more years raising Negro achievement levels, and then desegregate.

Mardian told the secretary he should not rewrite the guidelines because that "would be misinterpreted as a basic retreat by the department" and would damage our overall enforcement program." He suggested that the guidelines quietly be bent.

Barbara Pearson Lange, dean of women at Southwest Texas College, says the generation gap isn't a case of adults not talking to or understanding young people—it's often the other way around.

2 Seniors 'Out' Over Critical Letter; To Sue

FROM PAGE 1

Charles Hall, said he will file the suit by Tuesday. "It's clear to me this young man's rights have been violated," the lawyer said.

One of the two newsletters, allegedly edited by the two students, states it was printed by the Students for a Democratic Society, radical student organization blamed for many disturbances on college campuses.

"Both boys told me they are not members of SDS but a friend of theirs at the University of Houston if a member and he arranged to have the newsletter printed," Hall said.

Handed Out

The attorney said the youths did not distribute the newsletters on the Sharpstown campus but handed them out at a park near the school.

"As for SDS, I don't think it was their project, but even if it was, this has no bearing on the constitutional question here," Hall said. "The school district is really in left field on this one. Does the school district have the right to suspend a student for something he wasn't even done on school property? Can they prove this disrupted the school operation?"

Dr. Woodrow Watts, deputy superintendent for secondary schools, said administrators cannot tolerate activities of students that hinder operation of a district. Coy Stuart, principal of the school could not be reached for comment.

Hurts Image

Watts said he believes criticism of administrative actions constitutes disruption of a school's operation.

"This hurts a school's image and we will back the principal in such cases," Watts said.

The parents refused to discuss the case.

Channel Traffic Bill Draws Fire at Port

FROM PAGE 1

thority of the Navigation District beyond its present limits—the district piers around the Turning Basin — to the county line.

Bill Provides

The bill provides that the Navigation District may collect fees from ships using the port to pay for traffic control and fire protection.

Henderson fears the additional fees would reduce business at the port.

"Just about a year ago the Port of Houston increased substantially its fees (for wharfage and dockage)," he said.

He quoted an opinion Jan. 9, 1969 by Atty. Gen. Crawford Martin that "the general fire and police powers on and near the Houston Ship Channel are vested in the City of Houston."

Welch, who discussed the bill in late February with County Judge Bill Elliott and two Navigation District commissioners, backs the bill.

Thursday he succeeded in getting a City Council resolution in favor of it.

Not Discussed

The Navigation District board has not discussed the bill in a public meeting. Commission Chairman Howard Tellepsen, Commissioners R. H. Pruett and Fentress Bracewell and the executive director of the district, J. P. Turner, have been at a worldwide ports and harbors meeting at Melbourne, Australia, for several weeks.

Henderson also opposes a bill introduced by Swanson that would change the method of selecting Navigation District commissioners.

At present City Council selects two, the Commissioners Court selects two and the chairman is chosen by both bodies jointly.

New Method

The new method would allow the county judge to select two with commissioners' approval and the mayor to select two with council approval. The chairman would be chosen by the judge and mayor jointly, with approval of the council and commission.

County Judge Bill Elliott supports that bill. Welch says it is "a matter of utmost indifference to me."

Deadline For Liberty Bell Award Set

April 13 has been set by the Houston Bar Assn. as the deadline for submitting nominations for the annual Liberty Bell Award.

The public nominations for the award may include any individual, except lawyers and judges, who has contributed outstanding service to the community.

A committee composed of the presidents of the Chamber of Commerce, the Harris County Medical Society, the Houston Council of Churches and the Houston Bar Assn. will select the recipient. The award will be presented during the Law Day U.S.A. program May 1 at the Music Hall.

Nominations may be mailed to the American Citizenship Committee, the Houston Bar Center Bldg., 723 Main.

4 Fights Erupt Around Saigon

FROM PAGE 1

dent Nixon Sunday. Bunker declined to comment when asked about reports he had recommended a resumption of the bombing of North Vietnam in retaliation for the Communist offensive.

In the largest fight reported in Saturday afternoon's war communiques, a South Vietnamese paratroop battalion killed 40 Communists in a four-hour battle in Tay Ninh province near Cambodian territory 51 miles northwest of Saigon.

Five South Vietnamese troops were killed and 20 wounded.

U.S. troops of the 1st Cavalry Division, supported by artillery and helicopter gunships, killed 10 Communists in a brief skirmish near An Loc 47 miles northwest of Saigon. There were no American losses.

In fighting within a few hundred yards of the Cambodian border and 23 miles west of Saigon Saturday, a combined force of South Vietnamese and American soldiers killed 16 Communists. Allied losses were not reported.

9 VC Killed

In still another clash, South Vietnamese militiamen killed nine Viet Cong guerrillas 14 miles southwest of Saigon. The South Vietnamese force, backed by tactical air strikes, lost one man killed and two wounded.

Communist gunners shelled 20 military bases in South Vietnam Friday night and early Saturday, a sharp drop from the 65 raids of the preceding night. And Saturday morning barrages.

In other action, the U.S. command said Communist groundfire shot down an American observation plane and a helicopter Friday killing six Americans and wounding three.

Five Americans were killed and two wounded in the downing of a UH1 helicopter 60 miles northwest of Saigon in Tay Ninh province. One crewman was killed and one wounded when an Army light observation plane was shot down about 20 miles northwest of Kontum City on the central highlands.

Gov. Smith Says Open Mind, Door Key to Problems

Laredo (AP)—"An open mind, an open door, and a willingness to work and help each other can do such a long way in conquering our problems," Gov. Preston Smith told an international organization Saturday.

Smith spoke to the Pan American Round Table of Laredo, a women's group, and city officials of Laredo and Nuevo Laredo, Mexico.

"There is no work more important than the creation of understanding," Smith said. "It is through understanding that we begin to erase the borders of fear and distrust and war, and merge people into the unity of peace, friendship and progress together."

French Ambassador Will Speak Here

Ambassador Charles E. Lucet, envoy of France to the United States, will be presented to the public in the Fondren Library Lecture Lounge at Rice University at 3 p.m. Friday.

There will be no admission charge. Lucet will discuss Franco-American relations.

His visit will coincide with arrival of two French naval training vessels that will dock at Galveston Thursday and move up the Ship Channel to Houston the next day.

They are the Jeanne d'Arc and the Victor Schoelcher, manned between them by 125 cadets.

Soviet N Physicist Lives in Uncertainty

BY EDWARD COWAN

©1969 New York Times News Service

Yellowknife, Northwest Territories — Boris Dotsenko, a Soviet nuclear physicist who has visa expires in September, Union, lives here in a world of uncertainty.

Eighteen months after he elected to stay in Canada, to he had come as an exchange teacher, he has neither a job commensurate with his experience nor any assurance that Canada will not turn him out.

He teaches science in a junior high school in this subarctic town of 6000 and he wonders what Ottawa will do when the second one-year extension of his visa expires in September.

Social Lion

Nevertheless, Dotsenko, who is 42 years old, is said by colleagues to be cheerful and something of a social lion in the closely knit community. He is described as amiable, charming and a good conversationalist and he is invited often to Yellowknife's cocktail and supper parties.

On weekends he walks, skis cross-country and plays badminton in the school gym with colleagues. He works hard and seems to enjoy life.

An article by him about his research at the University of Alberta in 1966-68 is expected to be published soon in the physical review, a scholarly journal.

When he left the University of Alberta last year, it was reported that all positions in the university's physics department for the next year had been filled and there was no place for him.

Adept Teacher

Dotsenko teaches biological and physical sciences. Several parents and pupils said he was adept at explaining the mysteries of science, at least to the brighter youngsters, and had given his classes a good grasp of the Apollo space shots.

A short, balding man who wears gold-rimmed spectacles, Dotsenko is said to have had only one bad experience since he came to Yellowknife from the University of Alberta last August. Two Ukrainian - Canadian businessmen from Edmonton, bundled in great black coats and fur hats, stopped at the Yellowknife public school to introduce themselves to the Ukrainian they had read about in the newspapers.

Not bothering to explain who they were, they asked for Dotsenko in a gruff way and with heavily accented speech. Everyone feared they were Soviet agents. A brief panic ensued.

Return Home

In fact, although Soviet diplomatic officials did try in 1967 to persuade Dotsenko to return home, there is no indication that Western intelligence agents consider him a "catch." He has said he did no military research. He directed the nuclear laboratory at the University of Kiev from 1962 to 1965 and then relinquished administration to do research.

He would like to resume his research into subatomic structure, or at least teach university - level physics. According to those who knew him at Edmonton, he has a good chance to get a job in the U.S. where there are more colleges than in Canada.

His problem at the moment, these sources say, is that, having renounced Soviet citizenship and mailed his passport to the Soviet Embassy, Dotsenko is a man without a country. He is said to have been told by U.S. consular officials that he could first get such a status in Canada.

Dr. Dotsenko's defection led to suspension of an exchange program between the Universities of Alberta and Kiev. Neither side has attempted to start it again, according to an Alberta source.

In 1967, when he decided not to go home, Dotsenko said he had resigned from the Communist Party and applied for a divorce. His wife is understood to have opposed the divorce.

Symphony Fund Goal Largest Ever Sought

FROM PAGE 1

campaign of the University of Houston, which last year raised $1.1 million.

Hirsch cited these symphony benefits and statistics:

- 54,000 boys and girls annually attend 18 student concerts.
- 100,000 annually attend free park concerts in the summer.
- 30,000 annually attend the three Chronicle concerts in the coliseum.
- 250,000 attended the four concerts of the past four years.
- Thousands hear the Sunday evening broadcasts on Radio Station KTRH.
- Eight or 10 regional concerts are played each season.
- The orchestra plays for the 25 performances of the Houston Grand Opera.

The financial advisory committee for the campaign includes: Gen. Hirsch, Gus S. Wortham, Miss Ima Hogg, George R. Brown, George A. Butler, Charles L. dybee, James A. Elkins Jr., Alfred C. Glassell Jr., Marvin T. Hurley, Dr. Charles F. Jones, John T. Jones Jr., William A. Kirkland, P. H. Robinson, Milton R. Underwood, Lewis White, John E. Whitmore, Lovett Baker, Milton S. Berman, J. W. Hershey, H. J. Frensley, Michel T. Halbouty, Gerald Hines, Leon Jaworski, James E. Lyon, Clyde McGraw and Robert A. Mosbacher.

Also, George Mitchell, Philip Sayles, Fayez Sarofim, Frank A. Watts, Howard Boyd, Mrs. Ray L. Dudley, Mrs. Ira McFarland, Mrs. Flora Isabel Johnson, Allen Carruth, N. W. Freeman, Newton Heverstock, William H. Lane, Lawrence Marcus, L. F. McCollum, Fred Schwend, J. O. Winston Jr. and Robert R. Herring.
